DESCRIPTION

- Special corundum mixture bond for sharpening diamond cutting blades and diamond core drills.
 High sharpening speed without damaging the grain.
 Diamond cutting blades with a diameter of more than 230 mm need to be sharpened with the large sharpening stone.
- For all diamond core drills the large sharpening stone is recommended.
- To sharpen the diamond blades and diamond core drills, just cut into the sharpening stone 2-3 times and the diamond cutting edge will then be exposed and sharp. Only sharpen dry. No water is required.
